

Netarx

[net'-arks]

NOUN: net•arx , *def. network fortress or stronghold*

What is Business Transformation?

Many organizations deploy a variety of technologies to their employees; however few realize the full potential of the technologies they offer. Do your users struggle with the many tools deployed within your organization (i.e. ERP, Email, Document Storage, Collaboration, and Telecommunications)?

Most of our clients already own the KEY components needed to realize additional business value. Netarx provides the knowledge and expertise to successfully analyze and improve business processes and integrate the many technology tools available. We partner closely with our clients to address their unique needs and complement the strategic business direction.

- Increase Operating Income/Employee by maximizing productivity
- Realize a greater return on their existing technology investment
- Solve tactical business problems that you face each day
- Build a convincing business case to drive change and improve business processes
- Receive 3rd party solution analysis and services from Netarx

Netarx portfolio of Business Transformation Services (BTS) Offered:

- Collaboration Strategy Development
- Portfolio Planning & Prioritization
- Software Selection
- Technology Assessment
- Process Mapping Workshops
- RFP Development and Management
- Full MOSS Implementation and Integration with Office Communicator, Exchange, Unified Communications
